REMARKS

Applicant has carefully reviewed and considered the Office Action mailed on December 4, 2000, and the references cited therewith.

Claims 1-61 are pending in this application.

§103 Rejection of the Claims

The invention set forth in claims 1-57 relates to systems and methods in computer programs wherein a document template is created from a downloaded authoring program wherein the authoring program is downloaded from a server computer to a client computer. The document template maybe used by the client computer as for example set forth in claim 4.

Claims 1-61 were rejected under 35 USC § 103(a) as being unpatentable over Grasso et al. (U.S. Patent No. 5,892,909). The applicants' have reviewed US 5,892,909 to Grasso. Grasso discloses an Intranet-based system with methods for co-active information delivery. The system allows users to manage the distribution and delivery of information across an enterprise Intranet, the Internet, and common communication channels (e.g., printers, fax, pager and e-mail). The system provides a wizard-like user interface which intuitively walks users through various tasks,
